GLOBAL PATENT TECHNOLOGY

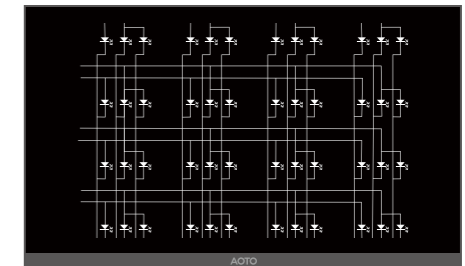

All-in-one Packaging Technology

All-in-one packaging technology supports smaller pixel pitch and increases the robustness. The display effect is highly enhanced through the 100um chips to achieve more black zones in the single package and the surface black nano-spraying technology.

Electronics Circuit Design

Latest design to reduce the difficulty and cost of the PCB design, improve production efficiency, reduce maintenance difficulty and cost, and achieve smaller pixel pitch.

Cross Groove Design

A light-shielding fence is set around each group of LED pixel lights, and a cross-sectional groove is formed between each light-shielding fence; at least two sides of the light body are set with a plurality of staggered protrusions. Groove anti-lighting technology makes the image clearer and improves contrast.

INGENIOUS AND DELICATE

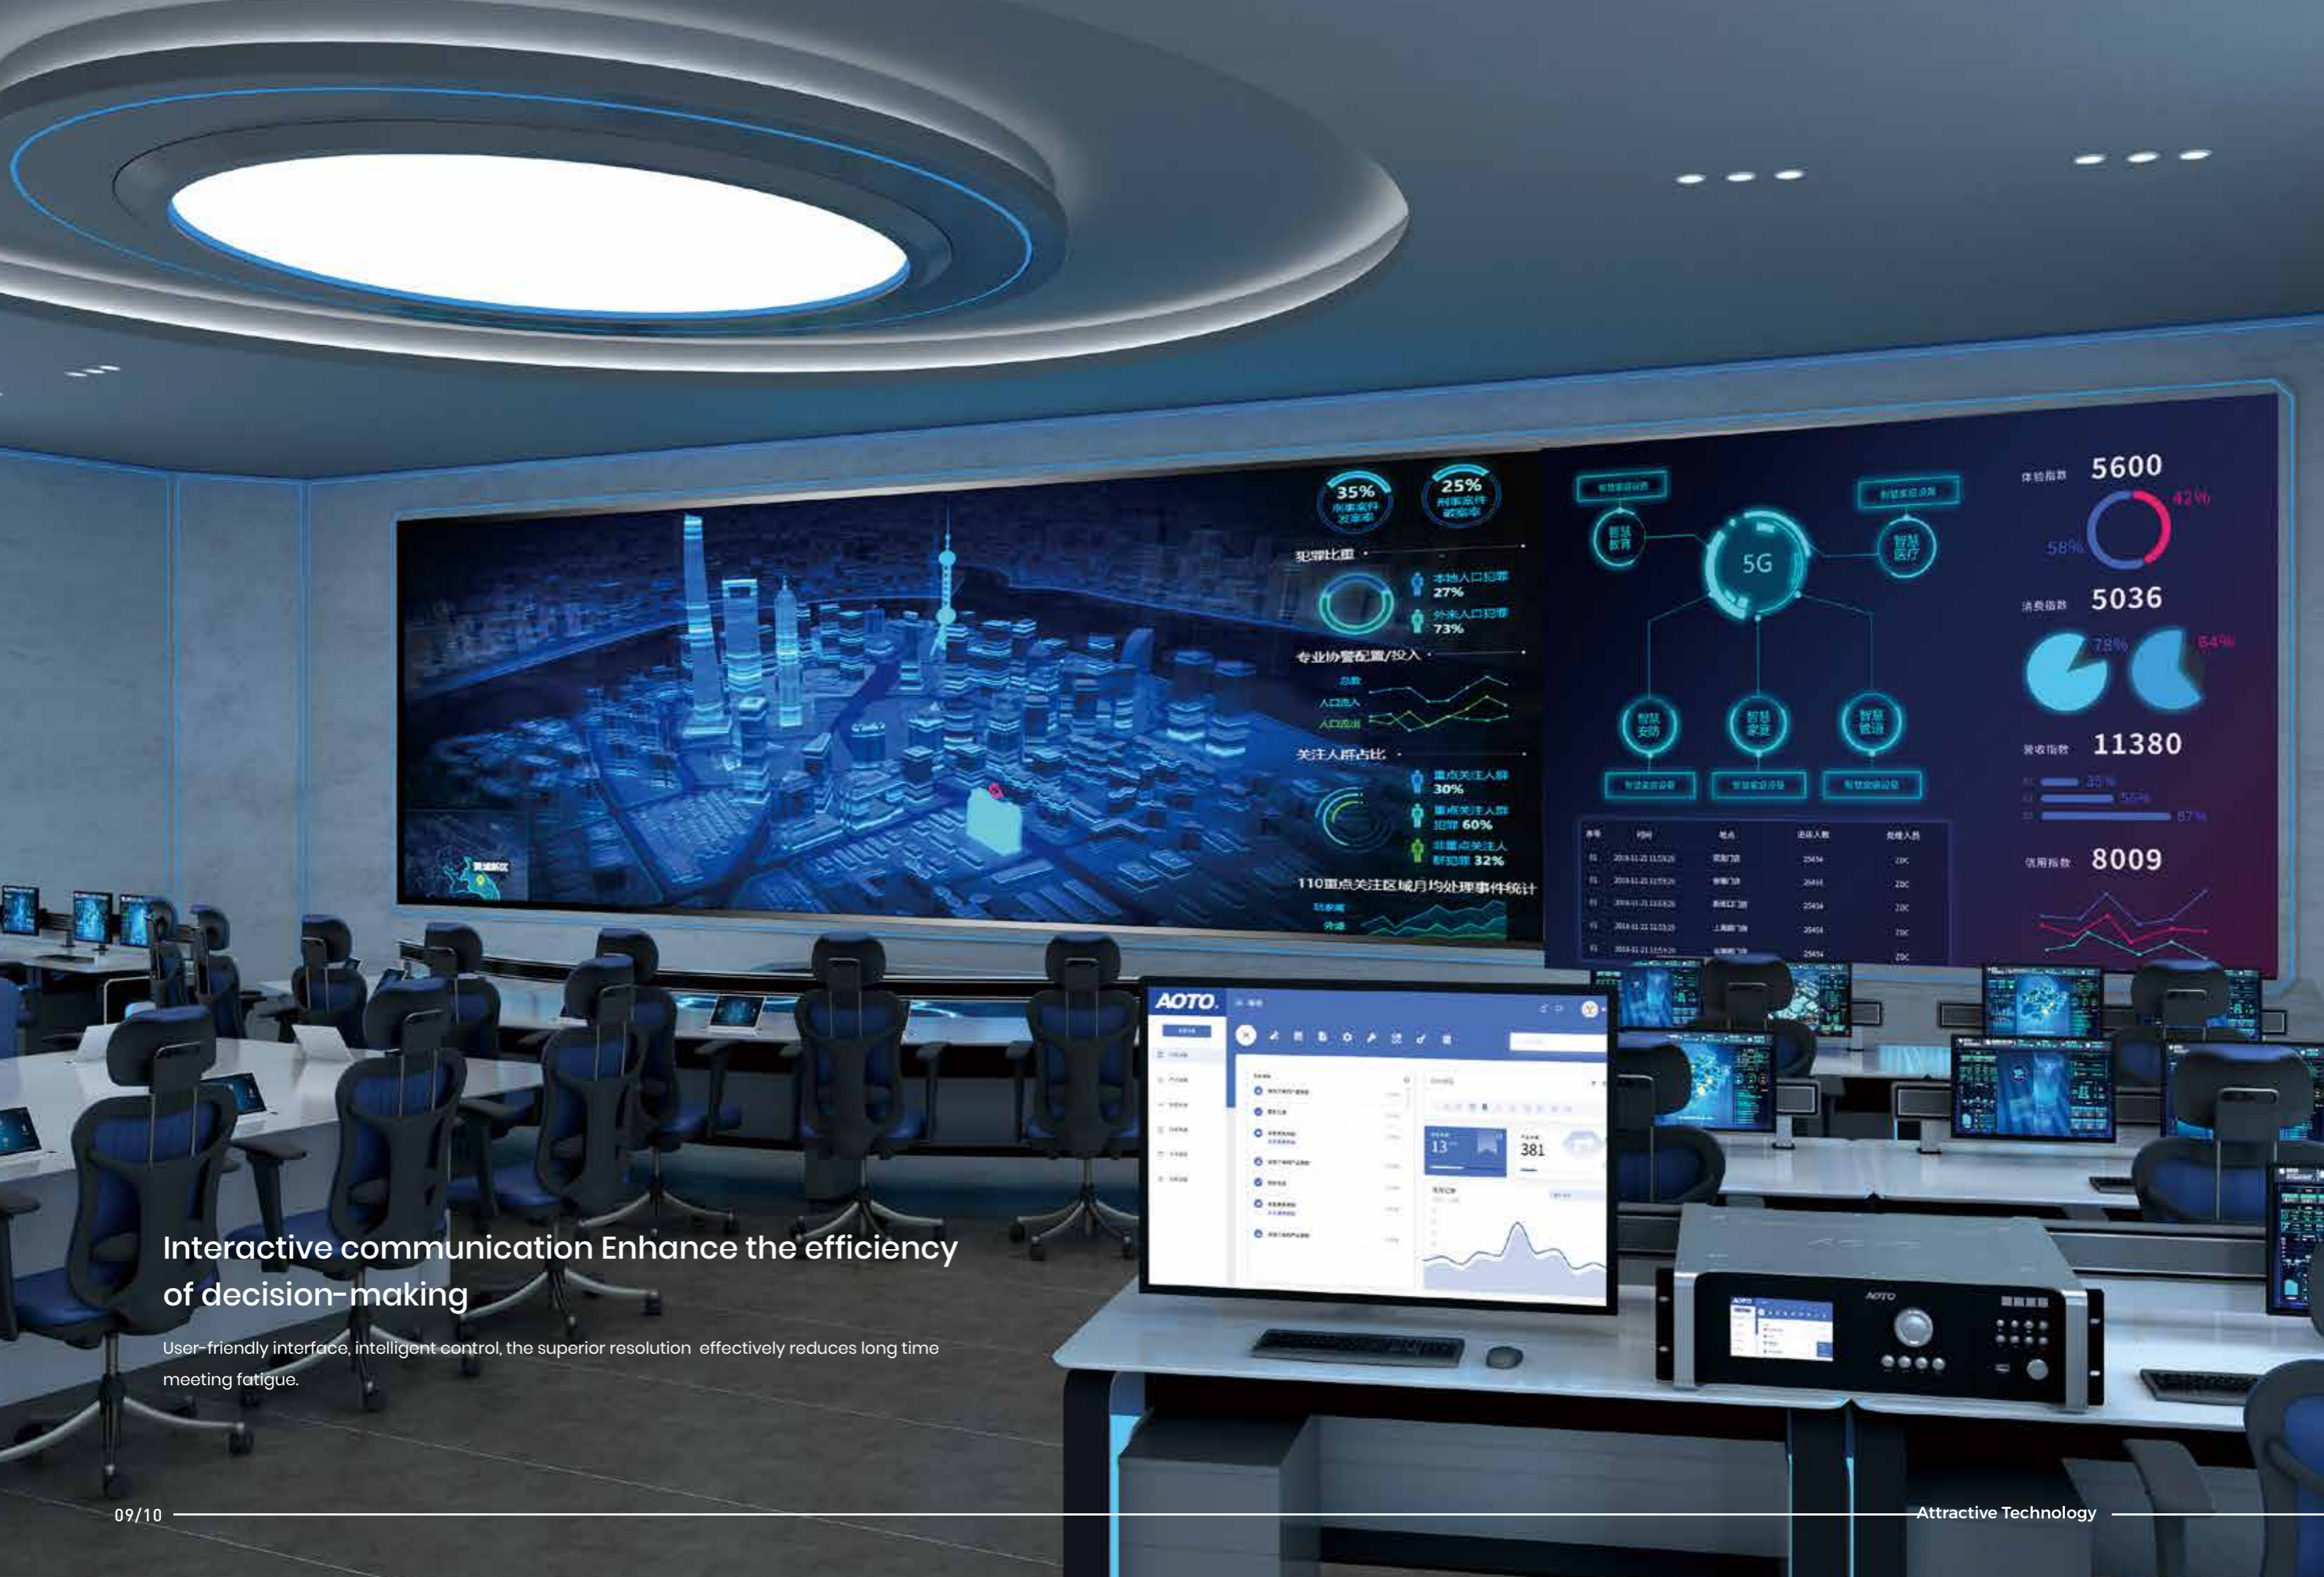

The simple and exquisite cabinet appearance guarantees an unparalleled viewing experience.
