THE HUB OF A collaborative CLASSROOM

SMART Board interactive displays let you leverage investments in classroom technology and infrastructure, bringing together devices, tools and content so teachers use them more effectively.

Engage Students Everywhere

Connect students with multi-way inking. Students can easily screenshare to showcase work and facilitate collaboration in the classroom - in any network environment.

SMART Mirror for displays with iQ provides native, browser-based and app-based screen sharing. The Windows and Mac OS app enables screen sharing without prior network configuration and includes touchback support.

Bigger better video conferencing

SMART displays work with UVC webcams, Zoom, Google Meet™, Microsoft Teams™ and more. Deliver lessons while sharing screens in these applications, and enhance them with digital ink and tools to focus students' attention.

6000S series integrated microphone array offers teachers the freedom to move around the class while maintaining consistently outstanding audio.

Plug & Teach

Enjoy the full SMART Board experience with any connected Windows® or Mac® computer, including SMART's best-in-class multi-user experience. Freeze and write over any screen, or install SMART Ink to flexibly ink into browsers and applications at will. 6000S and MX series also provide superior interactivity with Chrome OS™.

Easily connect any device via USB-C for video, audio, touch, data and charging with one cord.

Connect student devices for active learning with 2 clicks

Only SMART displays with iQ allow an **entire class to work directly in the embedded whiteboard - without student logins**, so teachers don't need to interrupt the lesson to get students signed into a separate tool.

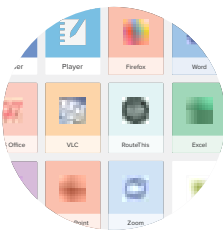

ENGINEERED FOR THE *simplicity* TEACHERS WANT

SMART's exclusive walk-up-and-use touch and ink experiences help teachers use their displays more easily, more effectively and more often - maximizing your tech investment.

Best-in-class touch and interaction

Only SMART displays with iQ allow multiple learners to write, erase, gesture and use tools at once over any program or application, without interfering with another user's tool choices.

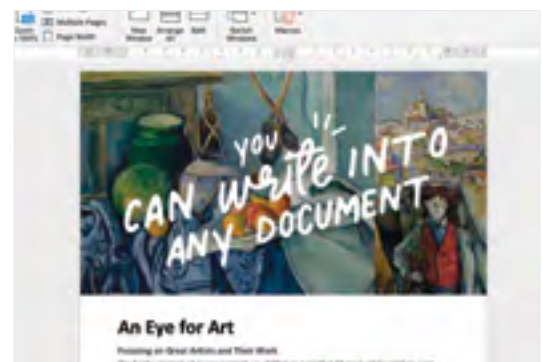

Secure sign-in, anywhere

Up to 20 concurrent users can sign into the display using their secure Google or Microsoft accounts. Enjoy a fully personalized desktop with one-click access to the files and apps needed to teach, plus cloud storage integration.

Ink anywhere, on any file type

Add and move notes, erase, or even convert ink to text. Overlay-free **SMART Ink™** maintains annotations, allowing users move to between applications and revisit notes - including web browsers, Microsoft Office files and PDFs.

Approach and use

Your SMART Board 6000S is ready to use whenever you are. With NFC-sign in, proximity sensors and quick power-on, you can pick up a pen and go.

INTERACTIVE RESOURCES, TOOLS AND

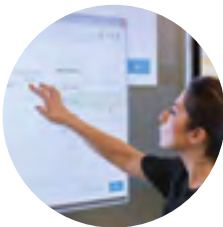

Software INCLUDED

Your SMART display arrives with an always-growing set of teaching tools, lesson creation software, ready-made activities and more – no subscription required.

Bridge physical tools and digital learning

SMART Board 6000S series includes the unique Tool Explorer platform, which integrates real-world tools and manipulatives with digital learning. *Tools sold separately.*

No computer needed

Use built-in Android computing to browse the web, use the whiteboard, access apps, screenshare and more, without using a connected device.

Access a massive free content library

Find ready-made lessons, activities and games created by teachers, for teachers with SMART Exchange. Searchable by subject, grade and education standards.

Use free interactive software

With built-in Android and free, powerful lesson creation software including SMART Notebook, your SMART Board enables dynamic learning from the moment it arrives.

Customize with SMART accessories

Connect your classroom with accessories including SMART Remote Management software, SMART Document Camera, mobile and wall stands, OPS PC modules and more.

SMART

READY TO

transform YOUR CLASSROOM?

SMART Board interactive displays are easy to deploy, use and support. SMART has the experience, knowledge and resources to support a fast, effective technology implementation, reducing training costs and support calls, adding up to a lower total cost of ownership.

Find the SMART Board interactive display that fits your needs. Book a demo or talk to a SMART representative.
